

ASSA 5-WAY GUARANTEE

1. ASSA guarantees that no other Top Master key, for any other ASSA factory generated system, will operate as a Top Master key in that end-users system, for a specific geographical territory.
2. ASSA guarantees that if the key should break, under normal usage, ASSA will replace it at no charge, plus any reasonable service charge.
3. ASSA guarantees its patented systems against unauthorized key duplication.
4. ASSA guarantees its products against defective workmanship or wear resulting from defects for life.
5. ASSA guarantees customer satisfaction.

1. Restricted to factory generated master key systems used in conjunction with ASSA End-User Restricted Key Section Agreement. ASSA assumes no responsibility for systems altered or rekeyed outside of the factory.
2. Reasonable service charge will be determined by a random survey of three local ASSA dealers at the time of the claim. Guarantee does not cover keys cut on unauthorized equipment or broken through misuse.
3. ASSA will enforce all effective patents and agreements through combined legal action with the customer. Customer agrees to assist ASSA in prosecution efforts against offending parties.
4. ASSA will repair or replace any defective product, with the decision to repair or replace at the discretion of the factory. Customer agrees to pay the cost of forwarding and return freight.
5. If, during the first year from the date of the signed agreement, the customer is dissatisfied with ASSA, its products or its systems, ASSA will take the necessary steps to correct the situation.

ASSA 5-Way Guarantee effective 01/01/02 and supercedes all other guarantees.

- Do you have trouble accounting for missing merchandise, office supplies, or information leaks ?
- Is anyone duplicating your keys without your knowledge?
- Can you be assured that no one else's keys operate your locks?
- How well do your locks work?
- Do your keys break?
- Do your locks stick?
- Do you have complete building access control?

ASSA is the answer for today's corporate and institutional security needs. From key control to quality control, from product versatility to product durability, ASSA means security.

ASSA

ASSA SECURITY

Those two words mean more key control, more quality control, more service. With those two words, and ASSA's Five-Way Guarantee, the complexities of today's business security issues are solved. ASSA covers security from every angle.

KEY CONTROL

ASSA guarantees that no other top master key, for any other ASSA factory generated system, will operate in that end-user's system for that defined region. Businesses today are faced with the ever-increasing problem of unauthorized key duplication, as well as the intricacies of access design. ASSA has developed a key control program that completely defends against potential weaknesses in a security system by assigning customers unique keyways with geographic

boundaries. We can masterkey and design ASSA security systems to fit any business. In addition, ASSA offers three separate key control programs for Twin V-10 and TWIN EXCLUSIVE that make controlling access

simple, convenient, yet risk-free. They are the C2E, C2R and C2L systems of key control for TWIN V-10, TEE, TER, and TEL for TWIN EXCLUSIVE

The Twin V-10 & Twin EXCLUSIVE SYSTEM

ASSA guarantees its systems against unauthorized key duplication. Our patented key and cylinders, designed to work in tandem with each other, are specially coded to match within millions of code possibilities. We offer unique keyways that protect against unauthorized duplication of your keys. In addition, ASSA itself has devised six separate systems of duplication controls, each matching your unique needs.

For TWIN V-10 C2R keyways are designed for use by the locksmith, and are available in Regional and National keyway levels. The C2L keyway is also for locksmiths and is perfect for

smaller geographical areas. Each sidebar has two key blanks, and sidebars are interchangeable between all ASSA products. This gives businesses both convenience and security. The factory-controlled C2E system guarantees in writing that businesses and institutions will have exclusive keyways. Plus, under each level, key and cylinder duplication procedures become increasingly more restricted, thus allowing our customers duplication control options.

For TWIN EXCLUSIVE, TER keyways are designed for use by the locksmith and are available in National and Regional keyway levels. The TEL keyway, also for locksmiths, is perfect for smaller geographical areas. Each sidebar has two key blanks, and sidebars are interchangeable between all ASSA products. This gives businesses both convenience and security. The factory-controlled TEE system guarantees in writing that businesses and institutions will have exclusive keyways. Plus, under each level, key and cylinder duplication procedures become increasingly more restricted, thus allowing our customers duplication control options. The ASSA TWIN EXCLUSIVE is a true upgrade to the Twin / 6000 product line and can be integrated into existing Twin/6000 keyways on profiles 51,52 and 62.

RISK FREE

ASSA guarantees that if the key should break, under normal usage, ASSA will replace it at no cost, plus any reasonable service charge.

LIFE TIME GUARANTEE

ASSA guarantees its products for life. In addition to backing up our high-quality product with guarantees of satisfaction, ASSA also

builds into each and every product uniquely designed features that masterfully resist attempts of physical attack. Drilling, prying, driving, pulling - no matter how determined someone is, special guard collars, case-hardened materials, drill-resistant inserts and specially engineered pins deflect forcible entry tactics. Our locks are so tough that they have passed the Underwriters Laboratory 437 tests, which measure physical resistance effectiveness.

CUSTOMER SATISFACTION

ASSA guarantees customer satisfaction. This basic tenant of ASSA philosophy is the basis of our full line of retrofit cylinders. We know the business of security from the inside out, and that means that both cost-plus-effectiveness are considered. In addition to our retrofit cylinders, ASSA is dedicated to developing other integrated product lines such as dead bolts, padlocks, cabinet locks, cam locks, switch locks, gate locks and key depositories.

ASSA offers a full line of Interchangeable Core high security cylinders that enable you to rekey

your lock in less than 30 seconds without changing cores! Imagine the security risks as seconds tick by... and then imagine the damage done. With ASSA's Interchangeable Cores have also been listed under UL 437, and offer the same flexibility in key control levels that all of our locks do.
